

Social Media Marketing

Platforms:

- Facebook
- Instagram
- Youtube

These are the most relevant platforms to use when you're building your brand on social media, of course, that are other platforms that will help you just as much but you will find the most success using this three. I am going to briefly go over how you can take advantage of each one and maximize your lead generating to keep your pipeline full. You will need to grow a following in order for these platforms to be effective so daily planning and content creation are crucial. Social Media is a great way to get your friends and family to support your business.

Facebook: Facebook is great due to the high volume of users that it has, also the demographics of its users base are also something important for us to consider. Facebook has an older user base so the people that use Facebook are more likely to be homeowners. Grow your following every day, create content that can be shared by others, ask your warm market to support your page by sharing your comments and liking pictures. You can also run Ads on Facebook to generate leads, I would suggest saving some funds to run your Ads, and do it with someone that you can trust that will run your ads effectively.

Instagram: Instagram is a great recruiting tool, it is also great to share the day-by-day lifestyle of a solar consultant. If you're having success in the business, share your success with others, someone is watching and is willing to do what you do. Share with your followers about what you are doing, and why you are doing it. You can also run Ads on Instagram but it's more of a tool to run traffic to another destination like a landing page or website.

Youtube: Youtube is a great platform to help build your brand, as a content creator it is important to have different avenues for people to find you easily on social media. Youtube is also a great way for potential customers to discover your company. Share customer video testimonials or FAQ about solar.
